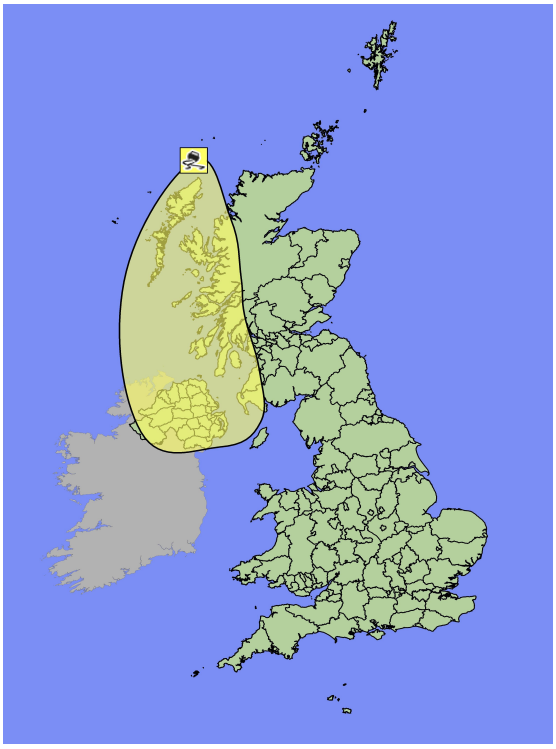
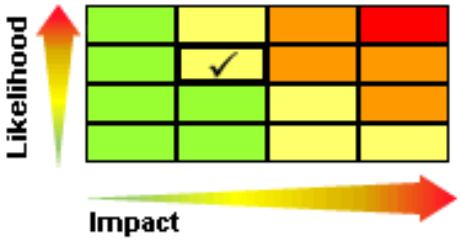
National Severe Weather Warning Service





Chief Forecasters Assessment
Low pressure will transfer south across the country today, as slightly a slightly milder Atlantic air mass pushes in from the northwest. However, coming from Iceland, the air will still be cold enough for road surfaces to fall below zero C.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **16:00 on Mon, 14th Jan 2013** until **10:00 on Tue, 15th Jan 2013**

Icy stretches will form on untreated surfaces, especially areas affect by showers. The showers will continue to fall as snow on higher ground of western Scotland, further accumulations of 2 to 5 cm expected above 200 m.

The public should be aware of possible travel disruption.
